

# Leading Learning to 18

## The Principal's Role in Student Success

*From Vision to Practice: Reach Every Student*  
A web conference for principals, vice-principals and their school teams

### Own Your School Data: Improve Student Achievement

Tuesday, September 22, 2009

9:00 a.m. - 11:00 a.m.

To continue to support principals in the effective implementation of the Learning to 18 and student success initiatives, the Catholic Principals' Council of Ontario and the Ontario Principals' Council, in partnership with the Ontario Ministry of Education, will be offering a new series of web conferences **with a focus on the effective use of data**.

Expert facilitators and participants will explore strategies for accessing, understanding and sharing multiple sources of data with their school communities to improve instruction and maximize the success of all students. Participants will be provided with data specific to their school from the ministry prior to the web conference.

Near the end of each web conference, participants will be trained to use the Leading Learning to 18 Web Network, a blogging platform that will allow interested participants to continue the dialogue and sharing of resources. Principals and their school teams are invited to participate from the comfort of their own school. Access to a high-speed internet connection and speaker phone will be required.

By participating in this web conference, you will:

- Contribute to meaningful discourse regarding critical issues of data use and student success
- Join and participate in an ongoing Leading Learning to 18 blog

Curriculum Services Canada (CSC) will provide one-on-one training and support, before, during and after the web conference.

---

#### Registering for the Web Conference

One principal (or vice-principal) can register on behalf of a school team. Please provide the name and contact information of the delegate (and additional colleagues) by going to [http://www.curriculum.org/csc/conf\\_L18\\_Data.adp](http://www.curriculum.org/csc/conf_L18_Data.adp).

#### Setting up for the Web Conference

You will be contacted to participate in a ten to twenty minute web conference training session prior to the web conference. This training will take place over the phone and on a computer with Internet access which will be used during the actual web conference. **Please contact Stephen Kunc of Curriculum Services Canada at 1-866-915-1133 or [skunc@curriculum.org](mailto:skunc@curriculum.org) to book your training session.**
