

THE LEARNING PARTNERSHIP

Champions of Public Education Across Canada

presents

ROUND TABLE ON TECHNOLOGY

November 2008

November 18, 2008 Breakfast Meeting

The Learning Partnership is a not-for-profit organization dedicated to bringing together business, education, government, labour, policy makers, and the community to develop partnerships that strengthen public education in Canada.

About RTT

The Learning Partnership's Round Table on Technology Program focuses on opportunities for members that stimulate dialogue around critical issues in Information and Communication Technology (ICT) in the education sector. These opportunities include 2-hour breakfast meetings, one half-day subject-specific summit, The National Technology Innovation Awards, the ICT Leadership Institutes and professional development events.

[Important Update: Join this Event Virtually!](#)

"The Environmental Impact of Computers"

The importance of this event and the number of registrations to date has encouraged us to offer an online "Virtual" participation option. Anyone wishing to participate and interact with the discussion panel but who cannot physically attend the event at HP Headquarters in Mississauga can register to take part from any location in Canada via a "Virtual Room." Online participants will be able to listen to the panel discussion and ask questions through the online conference moderator. All you need is a computer connected to the internet and a telephone line for the audio conference call. These services are being donated by both HP and the Learning Partnership at no cost to participants. Please feel free to invite colleagues to join you at our Mississauga event or encourage them to join us online. Breakfast is difficult to serve virtually but that is the only part they will miss! Why not invite a number of colleagues to join you online and share the experience using a speaker phone and computer?

Register early for this important event as spaces are limited! If you wish to participate online, please enter "**Online Participation**" in the subject field of your registration email.

Panel Members

Frances Edmonds, Director Environmental Programs, HP Canada

Glenda Geis, Executive Director, Waste Diversion Ontario

Wallace MacKay, Vice President of GEEP Global

Shauna McCaffrey, Executive Director, Renewed Computer Technology operating
Computers for Schools Ontario

School Board (To Be Announced)

Why Should You Attend?

The Round Table on Technology's breakfast panel discussion exploring the
lifecycle of computers
is on November 18, 2008

. The panel of experts will discuss the "greening of IT" and how it affects both school boards and the industry that supports them. The discussion will cover the manufacturing of computers to specific environmental standards, what affect new legislation in Ontario will have on technology users and manufacturers, what to consider when purchasing computers and how the reduce/reuse/recycling industry will help meet these new standards. The audience will be able to direct the discussion by posing questions to the panel during the event.

How will a "green" IT program affect school boards and the industries that support them?

Please join us and participate in this interactive panel discussion.
