

Attention Secondary School Principals and Vice-principals

Invitation to participate in a Web Conference on the effective use of data - ***Own Your School
Data: Improve Student Achievement***

Dear Colleagues,

The Catholic Principals' Council of Ontario and the Ontario Principals' Council, in partnership with the Ministry of Education and Curriculum Services Canada, will once again be offering a web conference with a focus on the effective use of data. Expert facilitators and participants will explore strategies for accessing, understanding and sharing multiple sources of data with their school communities to improve instruction and maximize the success of all students. Participants will be provided with data specific to their school from the ministry prior to the web conference. The date for this web conference is Tuesday September 22 at 9am to 11am. Participants will also be invited to continue the dialogue and sharing of resources through a virtual professional network called NING. Please join us for an opportunity to learn from an experienced team of principals and to share effective practices with your colleagues across the province. You are encouraged to register as soon as possible as space is limited. See attachment for more details and click below to register.
